

Gasoline & Diesel Storage Tank Certification

This certification application is required to record tests for contamination as required under the terms of the Slipstream® Marine Fuel Quality Control Certification Agreement.

Please note:

- When first applying for a certification, this form must be submitted to AFS with the marina's fully executed QC Agreement.
- This form is required to be submitted to AFS to comply with the annual (May 1st due date) test requirement for all certified marinas.

1. We herein certify that the below listed marina's gasoline storage tank(s) used for conventional gasoline has been tested and is free of water. _____(date)
2. We herein certify that the below listed marina's gasoline storage tank(s) used for ethanol blended gasoline has been tested and is free of water. _____(date)
3. We herein certify that the below listed marina's diesel fuel storage tank(s) has been "bottom sampled", properly tested and is free of microbiological contamination as of _____(date).
4. Our diesel fuel contains biodiesel. Yes (biodiesel _____%), No Do not know .

We will conduct additional tank test(s) no less than every 12 months by May 1st of each year to assure compliance with the AFS Marine Fuel Quality Control program.

We understand that fuel storage tank test(s) and certification, as described in the Slipstream® Marine Fuel Quality Control Certification Agreement, is required to continue the use of Slipstream® Marine Fuel trademarks and merchandising materials.
